## Movie series: "Sustainable Truth?"

**More than Honey** is a beautiful movie about the decline of bees. Depending on the world region, 50% to 90% of all local bees have disappeared, and this epidemic is still spreading from beehive to beehive – all over the planet.

**Invited to discuss the movie:** Georg Andersson, PhD at Centre for Environmental and Climate Research / Department of Biology, Lund University. He will talk about different food production systems and the pollinators' contribution and role.

**All our movie screenings are free of charge  
with free fika after the screening!**
